Professional Summary

Detail-oriented backend developer with 3+ years of experience building scalable RESTful APIs and microservices using Java and Spring Boot. Skilled in database design, containerization with Docker, and version control with Git. Passionate about clean code, performance optimization, and collaborative development.

Technical Skills

Languages	Java, SQL
Frameworks	Spring Boot, Hibernate
Databases	MySQL, PostgreSQL
Tools & DevOps	Git, Docker, Maven, Jenkins
APIs	RESTful API Design, Swagger
Others	Linux, Postman, Agile Methodologies

Projects

Inventory Management System
- Developed RESTful APIs with Spring Boot and MySQL to manage stock and orders
- Dockerized the application for seamless deployment
- Integrated Swagger for API documentation

Customer Feedback Portal
- Built backend services for feedback collection and analytics
- Implemented CI/CD pipeline using Jenkins and Git
- Ensured secure data handling and optimized query performance

Work Experience

Backend Developer – TechNova Solutions, Pune (Jan 2022 – Present)
- Designed and maintained microservices for an e-commerce platform
- Improved API response time by 40% through query optimization
- Collaborated with cross-functional teams in agile sprints

Junior Developer – CodeCraft Labs, Kolhapur (Jul 2020 – Dec 2021)
- Assisted in building REST APIs and integrating third-party services
- Participated in code reviews and wrote unit tests
- Supported deployment and monitoring of backend services

Education

Bachelor of Engineering in Computer Science Shivaji University, Kolhapur 2016 – 2020
